Flowering Plants

This new encyclopaedia, the second volume of which is presented here, offers access to the diversity of ferns and seed plants, the most imrtant groups of green land plants.

Flowering Plants · Dicotyledons: Magnoliid, Hamamelid and Caryophyllid Families

My thanks go also to the copyright holders of the illustrations who so generously authorised the use of the material included in this volume. Available information of general and systematic relevance is synthesized at the level of families. It would hardly have been possible to complete this volume without the help so generously offered by many colleagues.

The Families and Genera of Vascular Plants, Volume 2: Flowering Plants: Dicotyledons: Magnoliid, Hamamelid and Caryophyllid Families by Klaus Kubitzki
