### Press Releases

The STM stop-time measurement device measures the time it takes a machine to stop after a signal is given. The safety distance is then used to establish the location of the safeguarding device in relation to the nearest hazard.

### Heat Guide

Then, on the Format Cells dialog box, in the Number tab, under Category, click Date or Time and in the Type list, select a type, and click OK.

### Press

When determining the safety distance, a portable or built-in stop-time measuring unit must be used to check the stopping time  $T_s$  of the machine.

### Machine Guarding eTool

The stopping time measured by the STM device during the hazardous portion of the cycle is used in the OSHA or ANSI formulas to calculate the safety distance.

### Heat Guide

While his tenure in the House was brief, his service will be missed. Note: If the channel blanking feature is used on light curtains, additional safety distance must be enforced based on the number of channels blanked. When determining the safety distance, a portable or built-in stop-time measuring unit must be used to check the stopping time  $T_s$  of the machine.
