Giardia

A person can remain infected with Giardia until the infection is diagnosed and treated. In some cases, Giardia can be a long-term problem if it is not treated.

Illness and Symptoms

Other, less common symptoms include fever, itchy skin, hives, and swelling of the eyes and joints. You can get giardiasis if you swallow Giardia germs.

Illness and Symptoms

Following Germany, the UK reported 3,628 confirmed giardiasis cases.

Illness and Symptoms

Drugs used in the treatment of symptomatic giardiasis are reviewed in this study. Diagnostic Microbiology and Infectious Disease.

Giardiasis

Laboratories confirming diagnosis must notify public health units, who take action to prevent further spread of infection. Catania is a board certified Family Medicine Physician in Pennsylvania.

Giardiasis Guide: Causes, Symptoms and Treatment Options

Different factors may affect how effective a drug regimen will be, including medical history, nutritional status, and the condition of your immune system.

Giardia infection (giardiasis)

It is best to stay out of the water until at least two weeks after the diarrhea has ended. It can, however, cause lingering symptoms and some serious complications.
