## Gallery of Southeastern U.S. Birds

Oregon is at the southern edge of their winter range, and their wanderings about the state are erratic. The second part comes from the Greek for snow and belly.

## Gallery of Southeastern U.S. Birds

It prefers dense vegetation for its foraging and heights above 2,000m. Click a second time to pause the sound.

## Gallery of Southeastern U.S. Birds

The Song sparrow is a common and widespread resident of western Oregon.

## South American Birds: A Photographic Aid to Identification

Males are unmistakable when singing from a prominent perch, flashing deep azure upper parts with rich orange-brown breast and flanks, a white belly, and white wing bars. The principal breeding range of Sagebrush sparrow is southeast and central Oregon.
