National Academies, in collaboration with the Chinese Academy of Sciences CAS and Chinese Academy of Engineering CAE, reviewed renewable energy development and deployment in the two countries, to highlight prospects for collaboration across the research to deployment chain and to suggest strategies which would promote more rapid and economical attainment of renewable energy goals. It has led to tremendous achievements in computer-based structural engineering and there is evidence that this tendency will be accelerated.

## Lian Huan Hua 连环画

Specific recommendations have been limited to those judged to be most likely to accelerate the pace of deployment, increase cost-competitiveness, or shape the future market for renewable energy.

The Library has collected more than 150 titles of lian huan hua that were published mostly during the Cultural Revolution, particularly between 1971-1976, when the publication of lian huan hua was rare and difficult at that time.

## Lian Huan Hua 连环画

A subfield of machine learning, deep learning differs from conventional machine learning methods in its ability to learn multiple levels of representation and abstraction by using several layers of nonlinear modules for feature extraction and transformation.

## China Collection

The papers focus on the exchange of the latest scientific and technological progresses on HSLA steels, microalloying steels, and offshore engineering steels over the past decades. The extensive use and huge success of deep learning in speech, CV, and NLP have led to significant advances toward the full materialization of AI. This will be made possible by digitalization, networking and intellectualization, and will result in the extended connection of human societies around the globe, and a continuously enriched and expanded network space.
