Industry surveys

This includes 100 percent renewable goals in Hawaii and Maine, as well as the District of Columbia and the territory of Puerto Rico. In the , about half of the companies surveyed sought to add more renewable energy to their mix.

NERC

The technology and telecommunications group is among the most active industry sectors in renewable procurement, and one of the furthest advanced on this journey. The convergence of the electric, transportation, and building sectors may witness companies with varying levels of regulatory, technological, and capital constraints and opportunities partnering or competing with power and utility industry companies.

ASPBI Reports on Electricity, Gas and Water Supply

In some cases, they can also accrue tax credits or earn rebates for investment in renewable energy, energy efficiency, EVs, and EV charging infrastructure. And reducing environmental impact will likely remain a priority as stakeholder pressure expands. The largest declines came from the US -1.

ASPBI Reports on Electricity, Gas and Water Supply

Benefits data was not collected in 2020. Electricity is an essential utility in our society and one that is heavily regulated and scrutinized. Once businesses hire qualified workers however, they have very little trouble keeping them.
