## Sustainability accounting

In future, presenting only the economic growth in terms of conventional GDP may not be the sustainable index of overall development. Wealth-based approaches to sustainability refer to the preservation of stock of wealth. Sustainable Cocoa: Scaling up with private sector co-financing Cocoa is one of the most important commodities produced in Indonesia, with around 1 million independent smallholder farmer households dependent on the crop for their livelihoods.

## Sustainability accounting

It is not possible without understanding the physical representation. At the end of the compact, preliminary modeling estimated potential GHG emissions reductions for the 66 projects GPF supported at approximately 1 million tons of CO<sub>2</sub>-equivalent per year, or the equivalent of 2.

## Green Prosperity Project

Another analytical framework that monitors and tracks corporate performance is the sustainability evaluation and reporting system SERS. To address the challenge of falling productivity and economic returns in the cocoa sector, GPF prioritized catalytic private sector investment that promoted sustainable and less carbon-intensive economic growth among independent smallholder cocoa farmers.

## ESG in ASEAN: a shared vision of sustainable recovery

Compact funds were provided to form or expand cooperatives and enterprises, as well as to establish savings and loan facilities, which were managed by these women to maintain their access to finance and increase productivity. Lastly, the study also showed that when information was not advantageous to the organization, responsibility to the stakeholder is undermined.

## Green Prosperity Project

Albeit the contribution of this period was notable for extensive developments in the field of social audit, the methodology was nearly identical with

the historical financial accounting reports. In response, the President of Indonesia issued a Presidential Regulation to establish a Peatland Restoration Agency Badan Restorasi Gambut, BRG.

### **Sustainable Finance Solutions for SMEs**

Governance is the third area which needs urgent attention. It is pertinent to note two important things with respect to Green GDP. Turkey drastically reduced the share of oil in favor of gas.

### **The Case for Inclusive Green Growth**

It is derived from GDP itself after adjusting the cost of environmental degradation and pollution damage. For them, growth has not been inclusive enough.
