## Economic history of the United States

This period of prosperity, along with the culture of the time, was known as the. Sanitation was greatly improved by the building of water supply and sewage systems, plus the treatment of drinking water by filtration and chlorination. Steam power greatly expanded during the late 19th century with the rise of large factories, the expanded railroad network and early electric lighting and electric street railways.

## CAB Direct

The screw propeller was tested on Lake Ontario in 1841 before being used on ocean ships.

## Economic history of the United States

Although cotton was grown in India, China, Egypt, the Middle East and other tropical and subtropical areas, the Americas, particularly the U. In addition to transportation deregulation, savings and loan associations and banks were partially deregulated with the in 1980 and the in 1982. The use of steam engines in manufacturing increased and steam power exceeded water power after the Civil War.

## CAB Direct

Congress made two issues of paper money, in 1775—1780, and in 1780—81. With the coming of the steamboat after 1815, it became possible to move merchandise imported from the Northeast and from Europe upstream to new settlements. Automatic telephone switching, which was introduced in 1892, eliminated the need for telephone operators to manually connect local calls on a switchboard.

### **Economic history of the United States**

The building of roads in the early years of the 19th century greatly lowered transportation costs and was a factor in the of in U. At the turn of the 20th century electricity was used primarily for lighting and most electric companies did not provide daytime service. Standardization was urged by the Department of Commerce for consumer goods such as bedspreads and screws.

### **Economic history of the United States**

In 1838 there was a brief recovery. The farm programs typically aided large farm owners but eliminated opportunities for share croppers, tenants, and farm workers.

### **Economic history of the United States**

By the 1820s, housewives bought the cloth at local stores, and continued their sewing chores. Until that time a large share of power was self-generated by the user, such as a factory, hotel or electric street railway or streetcar.
