## Relationships and Learning

Schools are obviously not in a position to equalize this gap. But learners in the rural areas enter school with only their home language. This resource is designed for those involved in the education of early childhood English language learners young ELLs , including parents, educators, and policy makers.

### 'The Objective of Education Is Learning, Not Teaching'

Although they appreciated the fact that Spanish was used when their children first entered kindergarten, they wanted it to be replaced quickly with English instruction.

### How Diet and Nutrition Impact a Child's Learning Ability

Materials that children and their siblings brought home, often in the form of homework assignments, informed parents about their children's capabilities and engaged them in forms of interaction that they would have been unlikely to initiate on their own. For example, if a student has grown up in a household where mathematical subjects are given more weight than languages, that student may have a cultural barrier when it comes to learning subjects like English.

### 'The Objective of Education Is Learning, Not Teaching'

Instead, schools are serving whole-grain breads, fruits, vegetables, salads, and lean proteins. For our , we spoke to teachers and pupils to find out.

### 'The Objective of Education Is Learning, Not Teaching'

Two of these are development projects. Funding was also raised an issue as outdoor clothes, teacher training and equipment all need additional resources.
