## 10 Spectacular Yellow Coloured Fish—A Visual Feast

They have some of the but can be difficult to keep, making them a dream tropical fish for many advanced aquarists. I purchased a Volitan and it is the talk of the tank.

Several reports have been seen in the aquarium press about this fish having spawned, but to the best of my knowledge no one has ever raised them any to free swimming stage. It was formerly thought that there was only one kind of long-nose, but there are 2 distinct species involved, Both are very similar in appearance, but there are some minor differences which will enable you to tell them apart. These fish are wary and hard to catch without the use of chemicals now often used by collectors to anesthetize their pray It is one of the most beautiful of all the filefishes, but may prove to be one of the more difficult species to maintain in captivity.

## Saltwater Fish: Marine Aquarium Fish for Saltwater Aquariums

I hope this list has helped you choose the next fish you can add to your aquarium.

**Australian marine fishes in colour Neville Coleman 0589071416 9780589071417 Australian marine fishes in colour**

Summary There are thousands of tropical fish that can be kept in a home aquarium.

## Tropical Fish: Ultimate A

Australia's Dreamtime Dozen is truly just the starting point; many international anglers are catching creatures that they might not even have known existed up until the moment they come into view.

## 10 Great Saltwater Fish for the Home Aquarium

*Zanclus canescens* is the older name and therefore the valid one for this species. A fish-only marine tank can be just like keeping tropicals: use filtration to deal with waste, change the water, keep an eye on health, and add salt.
