Linguistic Intelligence Linguistic intelligence is the ability to think in words and to use language to express and appreciate complex meanings. He argues that conceptual categories and distinctions developed in response to art music are systematically misleading when applied to popular music 1996. Far from being a new debate, this disagreement between modernists and their critics was a direct continuation of the 19th-century debate about the autonomy of music.

Aesthetics of music

Beginning with 's work in the 1970s, has contributed extensively to the aesthetics of music. If we think of music intelligence as another way in which humans organize and make sense of their world and that musical thoughts and ideas need to be communicated to others, then it is easier to see the value of learning to develop the psychomotor skills and the interpretive skills necessary to communicate those ideas effectively. Among 20th-

century composers, is the most prominent composer to defend the modernist idea of musical autonomy.
