Cystic Fibrosis

People often feel a bubbling sensation in the chest.

Cystic fibrosis

Read more about transitioning to adult CF and our. Nutritional issues in cystic fibrosis. This glue-like mucus builds up and causes problems in many of the body's organs, especially the lungs, which can lead to infections, and the pancreas, making it difficult to properly digest food.

Cystic fibrosis

The body can't digest food as well so doesn't get the nutrients from the food. The development and delivery of drugs that improve the clearance of mucus from the lungs and treat the consequent infection, in combination with correction of pancreatic insufficiency and undernutrition by multidisciplinary teams, have resulted in remarkable improvements in quality of life and clinical outcomes in patients with cystic fibrosis, with median life expectancy now older than 40 years.

Cystic fibrosis

Thick mucus is hard to remove, so the microorganisms remain in the lungs, growing and reproducing.
