The Lime Twig; Second Skin; Travesty: Second Skin: John Hawkes: 0140189823

Great adventure novel and family memoir about life in Alaska in the early 20th century and how one's early life can shape what's to come. Second Skin 1964 is a tale of suicide and new life on two mythical islands - one demonic, the other idyllic - and is a comic, magical evocation of The Tempest.

The lime twig. (1961 edition)

The Blood Oranges, a lyrical investigation of narrative truth which like the ourosbours swallows its own form infinitely, also reshapes Greek mythology to the uses of a social criticism in which Beauty has replaced The Good as the highest ideal. It also, without coming right out and saying it, explains both Sunny's and Uncle Jake's courses of action. However, given the low regard in which Papa apparently holds Henri, it has now become only more evidence of his own lack of control, control which he is in the process of reasserting.

J'en avais gardé un assez bon souvenir, mais à le relire aujourd'hui, je me suis profondément ennuyé. Though the tone of the novel strives to be comic and optimistic, the narrator's life is beset by a series of tragic events: his father a mortician, his wife, and his daughter Cassandra commit suicide; his son-in-law Fernandez is killed after he has left Cassandra to live with his gay lover; Skipper is beaten up and perhaps raped during a mutiny on board of U.

The novel is told in a non-linear fashion through a series of flashbacks. When he finally stopped for good she was bleeding, but not from any wound she could see.

All That Remains: On the Fiction of John Hawkes

Its alright, just sort of does its job but never really reaches any spectacular heights. As with all his works, beneath the surfaces of our illusions there is a deep well of inchoate passions, a Shadow realm in which all things may run amok. It is very impressive and a sort of feat, but it is not sustainable as a reader, or perhaps might be if read one page long portion at a time.
