## Builder's guide (2005 edition)

It burns, it rots, it has different strength properties depending on its orientation, no two pieces are like, and most cruelly of all, it expands and contracts based on the relative humidity around it. Nailing wood, screwing wood and gluing wood will not prevent it from moving. Home owners should know what to look for.

## Minnesota Sustainable Housing Initiative

Now I look forward to using this hot and humid climate book to build in Nevada.
