Navdanya's Diary » Blog Archive » Monsanto's Climate resilient plant patent rejected by India's Patent Office, Rejection upheld by the Intellectual Property Appellate Board

Many of these resource-conserving innovations build on the concepts such as biomimicry, which metaphorically explore functional adaptations to desert heat and drought that have emerged among desert plants, habitats and cultures over the millennia. More than 50 million hectares of organic farmland A total of 50.

Which Future of Food and Farming

The 1992 floods of the Ganga-Brahmaputra-Barak system killed 10,000 people. Meanwhile, peasant farmers, civil society and social movements are actively building alternative food systems built on resilience, sustainability and sovereignty.

The Corporate War Against The Planet, People and Democracy

Accordingly, WTO Members may extend patent protection to cover plant varieties or may choose, as European countries have, to keep conventional plant breeding out of the patent system. Armed with genomic information, Gene Giants are making claims across species, genera and classes.

Bioballistics: A plate full of toxins

Currently in Odisha we are conserving 804 varieties of native Paddy, of these 184 varieties are climate resilient. Led by Sterling faculty, and consistent with its long standing place-based and experiential curricular model, the College will draw on the resources and expertise of The Berry Center and the natural and agricultural setting of Henry County, Kentucky. The Conservation Stewardship Program is a national, voluntary stewardship incentives program administered by NRCS that is designed to reward farmers, ranchers and foresters for maintaining existing

conservation, as well as for the adoption of additional conservation measures on their land.
