

Forest resource inventories - proceedings of a workshop

Dept. of Forest and Wood Sciences, Colorado State University - Integrated inventories of renewable natural resources: proceedings of the workshop. january 8

Description: -

-
Land grants
Education, Higher
District of Columbia
Forests and forestry -- Congresses. Forest resource inventories -
proceedings of a workshop
- Forest resource inventories - proceedings of a workshop
Notes: Includes bibliographical references.
This edition was published in 1979

Forest Inventory and Analysis National Program

The biomass equation will be developed using laser measurements and compared to estimated values based on ground measurements. These maps will be used for representing the spatial distribution of biomass, volume, basal area and additional forest parameters from the ground measurements. PY - 1983 JO - Washington, D.

Forest Inventory and Analysis Using GIS and Geospatial Systems

Combining field measurement in forest inventory and periodically acquired remote sensing data, it allows natural resource managers to monitor the environment dynamically. Through multispectral and multitemporal remote sensing, forest inventory and assessment can be achieved in a more efficient, frequent, and affordable way. AU - Ortman, Tom AU - Merzenich, James P.

Integrated inventories of renewable natural resources: proceedings of the workshop. january 8

Minho Park, Assistant Professor, Computer Science Department, Stephen F.

Proceedings of the Scandlaser scientific workshop on airborne laser scanning of forests

AU - Manning, Gary AU - Howe, George AU - McDivitt, Jim AU - Hansen, Chris AU - Fey, Willard R. Gyde; Preto, Giovanni, technical coordinators. The CIO has determined that the server on which EVALIDator is currently running is unstable, causing intermittent unavailability.

Combining inventories of land cover and forest resources with prediction models and remotely sensed data

The process will be repeated using profiling laser. In Finland several projects related to analysis of single trees detected in laser scanner data are ongoing.

2001 Workshop Proceedings Forest Measurements for Natural Resource Professionals

The method of data input to GIS is based on COM component object model. In Proceedings of 21st Biennial Workshop on Aerial Photography, Videography, and High Resolution Digital Imagery for Resource Assessment, May 15-17, 2007, Terre Haute, Indiana.
