### Water Data

WaterDataUS does not replace these mechanisms, which meet the needs of most public users and professionals who have limited requirements, and encourages everyone to make full use of these excellent resources themselves. The user sends an email or text message containing a USGS current-conditions gaging site number, and will quickly receive a reply with the station's most recent data for one or more of its monitored parameters.

### WaterData.US

No minimum given except amount of courage it takes to reach this launch. Updating you with the latest intelligence. Show custom graphs or tables for a series of recent data for one or more stations.

### New Mexico Water Data

Conservation storage is based on the bi-weekly changing Texas share. GWI WaterData is produced by Global Water Intelligence, the unchallenged leader in high-value business information for the international water sector.

### WaterData

Show a custom current conditions summary table for one or more stations.

### Lake Powell Water Database

While we would never knowingly link to a site which we believed to be trading in bad faith, GWI is not responsible for the content of these websites and we take no responsibility for the content, privacy practices, goods or services offered by these sites. Organized by the New Mexico Bureau of Geology, this multiyear effort will provide access to data on water quality, quantity, and usage in an open data framework to provide information critical to the responsible and responsive management of water in New Mexico.
