Therefore, any given night I might see ten different PCs varying from a 386 being stripped of useful parts, to a high end 486 being upgraded for one last cycle of usefulness, to occasional Pentiums. This section is dedicated to working with batch files and how that can enable you to use multiple AVR ISP MKIIs to gang program multiple Atmel chips. For the assembly fanatics, the Holy Grail must surely be a copy of Michael Abrash's Graphics Programming Back Book, Special Edition, with the all important CD-ROM - important because it holds two of Abrash's earlier books, The Zen of Assembly Programming and Zen and the Art of Code Optimization, as well as the whole of the massive Black Book itself, and a vast library of source code examples.
