Native and Indigenous Communities and Mental Health

Our objectives were to categorize the current nutritional status of children under the age of five and determine the underlying causes of poor nutritional outcomes. Lack of socioeconomic conduciveness among the individuals as well as the households from the marginalized sections has led to widespread undernourishment, where women, have suffered the worst health conditions.

Profile of a Humane Anthropologist

Sometimes we are working very far away. Parts of this study were presented in poster form at the Scientific Sessions of the American Heart Association, Atlanta, Georgia, 22—25 March 2011, and as an oral presentation at the Harold Hamm Oklahoma Diabetes Center 7th Diabetes Research Symposium, Oklahoma City, Oklahoma, 12 November 2011. In addition to in Na-Dené peoples, haplogroup C-P39 C2b1a1a is also found among other Native Americans such as - and -speaking populations.

15 Inspiring Indian Villages That Are Showing the Way Forward

The labour colonies we visited had poor hygiene and suffered from inadequate provision of water and sanitation facilities. This sets in a different process of genetic variation.

Gender Disparities in the Prevalence of Undernutrition and the Higher Risk among the Young Women of Indian Tribes

The author has long experience in planning and implementation of various tribal development programmes. It is also important for them to understand the impact and benefit of modern medicine.
