It was even used to justify dictatorial regimes, as in the case of Mexico. As a result, it was Spain, rather than Portugal, that first made extensive use of enslaved Africans as a colonial labor force in the Americas. A major and dramatic change affected the Hohokam and Anasazi societies in the twelfth and thirteenth centuries, however.

The Literature of Justification

In contrast to prior generations, the founders and those who followed them did not tend to adopt European ideas with a view to the defense of a body of doctrine, or in order to achieve certain practical ends of political liberation or of national unity and economic and social progress. Partly in response to this phenomenon, there has arisen a large body of literature concerned with the identity, authenticity, and originality of Latin American philosophy. However, it was not until the end of the first half of the twentieth century that they were seriously explored, in particular, by Zea and Frondizi.

Social Darwinism

Public Service In 1736, Franklin organized and incorporated the Union Fire Company, based on a similar service established in Boston some years earlier. Still, the sophistication of some thinkers, such as Korn, was considerable and planted the critical seeds that germinated in the following period.

Social Darwinism

The slaves' resistance to their situation was often passive, involving feigning illness, breaking equipment, and generally disrupting the routine of the plantation, but it occasionally did turn violent. It is not uncommon to hear that analytic philosophers lack sensitivity to the pressing problems affecting Latin America.
