## BANANAS, AND SUBTROPICAL FRUIT

## CHAPTER 36. CITRUS FRUIT,

The wide variety of package sizes and material combinations is a result of the market responding to demands from many different segments of the produce industry. Gillespie, Turner-Fairbank Highway Research Center, and University of Michigan.

### Mielőtt továbblépne

Heating Heat is not required during most ripening cycles.

### Mielőtt továbblépne

Limes should be picked while still green, but after the fruit has lost the dimpled appearance around the blossom end. The Bliss box was developed to be used when maximum stacking strength is required.

### Mielőtt továbblépne

Clamshells are gaining in popularity because they are inexpensive, versatile, provide excellent protection to the produce, and present a very pleasing consumer package.

### Optimum environments for the transport of fresh fruits and vegetables

Bulk produce may be transported in gondolas, dump trucks, or refrigerated vans. Kulash and American Association of State Highway and Transportation Officials. Precooling is the practice of cooling bulk produce prior to grading and packaging although the term has been used to describe cooling at any time before transport.

### **Commodity Codes Search**

More than 1,500 different types of packages are used for produce in the United States and the number continues to increase as the industry introduces new packaging materials and concepts.
