The powerful relationship of dissociation, DD, and suicidal and self-destructive behavior needs to be part of efforts to lower suicide risk in general and clinical populations. Proposals have a maximum word count of 2.

Transformation Educational Goals into Performance Indicators in Lithuanian and International Education Policy

Breast and Cervical Cancer is a kind of cancer that develops from breast cells. In retrospective, prospective, international, cross-cultural studies of traumatized populations—including children, adolescents, and adults—greater trauma severity and chronicity is generally associated with increased dissociative symptoms, higher dissociation scores on standard measures, and a diagnosis of a DD. Similar results were found in Norwegian naval cadets undergoing a POW simulation experience, and soldiers undertaking the grueling Combat Diver Qualification Course.
