## China's Highly Educated Talents in 2015: Patterns, Determinants and Spatial Spillover Effects

Its work on the economic correlates of temporal swings in United States internal migration using states as the areal units seems unprecedented, as are the efforts which its various authors have expended in the development of historical series for a variety of demographic and economic indicators at the state level. Spatial difference and influencing factors of settlement intention of urban floating population in China: Evidence from the 2015 national migrant population dynamic monitoring survey. Immigration and the Work Force.

Lee Everett S Ann Ratner Miller Carol P Brainerd Richard a Easterlin

Princeton, NJ: Princeton University Press, 1961. American Philosophical Society, Philadelphia, 1957.

## Interregional Per Capita Income Differentials and Convergence: 1880

Applied Spatial Analysis and Policy, 1—19. Reviewed Works: Population Redistribution and Economic Growth, United States, 1870-1950 ; Vol. Asian and Pacific Migration Journal, 0117196819832054.

## Study Materials

Chicago, IL: University of Chicago Press, 1985.

## The Boll Weevil, the Cotton Economy, and Black Migration 1910

A high proportion of the black children in rural farm areas are those of people who are dead, who are living elsewhere, or who are members of subfamilies whose heads are not household heads.

**Lee, Everett S. 1917**

A note on migration, economic opportunity, and the quality of life. *Journal of China University of Geosciences Social Sciences Edition*, 2007 5, 28—33. National Income, Expenditure, and Output of the United Kingdom, 1855-1965.

**The Boll Weevil, the Cotton Economy, and Black Migration 1910**

A rise in population numbers, even assuming no change in technology and no significant rise in per capita product, changes differential economic opportunities and induces migration if it occurs in a population settled in only part of a country's territory. You can help correct errors and omissions. Population Redistribution and Economic Growth, United States, 1870-1950: Methodological Considerations and Reference Tables.
