Pollination Ecology

Because of this diversity, pollination is greatly affected by the ecology of the environment in which the plant is growing. This book describes in detail the techniques used to study pollination mechanisms, thus providing the reader with all the necessary key information needed to carry out the experimental protocols provided. The flower colour of *Anemone coronaria* Ranunculaceae is a genetically inherited trait.

Pollination Biology of *Lespedeza davurica*

Dafni turns to the subject of advertisement in flowers in the fourth chapter; a discussion of flower color is followed by methods for colorimetric analysis of flower color and analysis of floral UV patterns.

Pollination Ecology : Amots Dafni : 9780199632985

Hence detailed knowledge of the pollination process and how this can be affected by ecological factors is crucial to a wide range of people working with plants, from researchers to farmers.

Pollination Biology of *Lespedeza davurica*

The topic of floral rewards in Chapter 5 is introduced with a table outlining types of rewards and their implications for pollination, sections on pollen chemistry and nectar are accompanied by extensive experimental protocols for measurement of energetic value and, in the case of nectar, volume, production rates, and constituents.

Amots Dafni

Generalization versus specialization in plant pollination systems.
