Wild animal and vegetation survey : South Hurunui forests, 1986/87 / G.T. Jane

The data product is of great use for relevant studies such as urban growth projection, urban sprawl modeling, and urbanization impacts on environments.

Mathias Ecological Area : animal

We report findings about thermal infrared optical properties of naturally dried samples of algae, sands, sea shells and synthetic plastics obtained in Chile.

Mathias Ecological Area: Animal

This data record also provides the UK contribution to a global system of long-term environmental research networks. This study produced a 16-year 2000—2015 global surface solar radiation dataset 3 h, 10 km based on recently updated ISCCP H-series cloud products with a physically based retrieval scheme. The altitude ranges from 1000m-2500m asl.
