industrialized nations'.

Population

There is no wonder then, even after over 50 years of planned economic development, 317 million people lived below the poverty line in 1993-94. Population explosions are always limited by resource exhaustion, starvation, or other environmental pressures which reverse them, usually rapidly. Furthermore, surveys of women in developing countries suggest that a large percentage—from 10 to 40 percent—want to space or limit childbearing but are not using contraception.

Measuring the effects of population control on economic development: a case study of Pakistan

But such a method of adjustment is not easy to achieve in India. I am considering paying myself. However, will we have the same amount of resources? In order to protect U.

Population and Development

A growing population, within a limited geographical area, usually puts heavy pressure on the existing factor endowments, especially natural resources of the community. Another example may be the intentional arming of radical Islam.

Population Control: Social and Economic Measures

However, it is questionable whether rapidly growing manpower supplies in labour-surplus developing countries exert a positive or negative influence on economic progress.
