Risk of bias assessment We evaluated the risk of bias of the included studies based on a previous approach. However, higher levels of religion and spirituality at the baseline were related to increased marijuana use at the 6-month follow-up, as participants reported that they felt more spiritually connected when they were high on marijuana. The outcomes of interest we started out with were: employment along an agricultural value chain; employment in agribusiness; engagement in contract farming; development of agricultural entrepreneurship; agricultural business performance productivity, profit, income, marketing rate ; involvement in agricultural extension service provision.

Agriculture Development, Employment Generation and Poverty Reduction in West Africa

These data and the evidence this study presents indicate that the decline in religious affiliation in the USA is a national health concern and not merely a concern for the religious groups.

Belief, Behavior, and Belonging: How Faith is Indispensable in Preventing and Recovering from Substance Abuse

A large majority of cases show that religious and spiritual beliefs and practices lead to lower levels of substance abuse, including reduced likelihood of using various drugs, in the course of a lifetime Degenhardt et al.

Belief, Behavior, and Belonging: How Faith is Indispensable in Preventing and Recovering from Substance Abuse

The impact of AA on professional treatment. This means that out of the total A. American Journal of Preventive Medicine.

A systematic review of employment outcomes from youth skills training programmes in agriculture in low

The remainder is hosted in congregations, community centers, etc. This offers unique prospects for economic development with concomitant

reductions in poverty and food insecurity. The study recommended that more people should be encouraged to practice farming in the rural areas and soft loans should be provided to the farmers if the nation wants to continue pursuing a high level of achievement in the provision of arable land.
