Large and small individuals must be kept separately.

Aquaculture: Types, Benefits and Importance (Fish Farming)

In some cases may be used in small doses to calm fish before transport. In 1995, salmon had a FIFO ratio of 7.

Aquaculture in Maine: Maine Department of Marine Resources

Aquaculture production occurs under controlled feeding, sanitation, and harvesting procedures primarily in ponds, flowthrough raceways, and, to a lesser extent, cages, net pens, and closed-recirculation tanks. . It is highly dependent on the power supply, as water has to be pumped constantly through the fish chambers.

What is aquaculture?

Visit the to learn more and find out how to apply. Java, blue and Nile tilapia are the best species for backyard fish farming.
