101:essays:automaticity [Neuroethics]

A theory of magnitude: common cortical metrics of time, space and quantity. However, recent studies suggest that access to the semantics of the word would be preserved if we looked at the color-associated word condition.

Christos Douskos, The spontaneousness of skill and the impulsivity of habit

These findings suggest that adenosine's effects on the human His-Purkinje system are primarily antiadrenergic and are thus consistent with the concept of accentuated antagonism.

Heart Automaticity

Towards parsimony in habit measurement: testing the convergent and predictive validity of an automaticity subscale of the self-report habit index. Influence: Science and practice 4th ed. The effect of processing speed on automaticity did not differ between magnitude dimensions.

Feasibility of a behavioral automaticity intervention among African Americans at risk for metabolic syndrome

Auto-motives: Preconscious determinants of social interaction.

Automaticity of Conceptual Magnitude

This task therefore seems consistent with the hypothesis of an automatic activation of semantics.

Automaticity of Conceptual Magnitude

This result was obtained with the inclusion of 79 participants compared with 16 by Manwell et al. In addition to the arrow included in the SLC presentation, a new cue was included, composed of two vertical lines.

Automaticity of Conceptual Magnitude

To verify that this decrease was not simply a question of motivation, Huguet, Dumas, and Monteil used the same paradigm and, to one group, proposed an extrinsic motivation a financial compensation to each person obtaining a good result. Tilelli MD, in , 2008 Digoxin Digoxin is a member of a group of glycosides derived from the foxglove plant and increases cardiac contractility and automaticity.
