## Concerti grossi, Op. 6 (Handel)

From the original autograph, Handel initially intended the concerto to have two extra movements, a fugue in the minor key as second movement and a final gigue; these movements were later used elsewhere in the set. The allegro is skillfully transformed into a more disciplined and broader movement than the original, while retaining its innovative spirit.

The larghetto, a gentle siciliana, is similarly transformed. Largo, e piano — iv.

## **12 Concerti grossi, Op.6 (Corelli, Arcangelo)**

Despite being fugal in nature, it does not adhere to the strict rules of counterpoint, surprising the listener instead with ingenious episodes, alternating between the ripieno and concertino; at the close, where a bold restatement of the theme would be expected, Handel playfully curtails the movement with two pianissimo bars.

## **Twelve concerti grossi, Op. 6 (Corelli)**

They alternate between a graceful legato and more decisive dotted rhythms.
