

Use of Arsenazo(III) in the Determination of Total Sulphur in Coal by the Oxygen-Flask Method.

s.n - 1 General analytical chemistry, Analytical and Bioanalytical Chemistry

Description: -

-Use of Arsenazo(III) in the Determination of Total Sulphur in Coal by the Oxygen-Flask Method.

-

Advances in botanical research -- v. 25

Canada Mines Branch Reprint Series -- 111 Use of Arsenazo(III) in the Determination of Total Sulphur in Coal by the Oxygen-Flask Method.

Notes: 1

This edition was published in 1972

Filesize: 6.74 MB

Tags: #Prof. #Dr. #Tasneen #G. #Kazi

Bibliography section

Several types of samples were also monitored by Brazilian research groups, such as workplace environments of cement industries processing organic residues.

Analytical use of arsenazo III: Determination of thorium, zirconium, uranium and rare earth elements

Katedra Anorganické Chemie ; MATUCHA, M.

Studies of the soluble part of oxidised coals

REVIEW Analytical chemistry in Brazil: healthy and growing Fábio R. Fingerprinting pattern recognition based on two-dimensional GC and GC associated with time-of-flight mass spectrometry was applied for cachaça samples during the fermentation process and after ageing in different wood materials. Shah, Evaluation of bioavailability and partitioning of Aluminum in sediment samples of different eco-systems by modified sequential extraction methods, Clean air, soil and water 2012 doi: 10.

Analysis of total sulphur in Canadian coals by a modified oxygen

Synthesis and sorption properties of porous resorcinol-formaldehyde resins prepared by polymerization of the emulsion dispersion phase. Nuclear Magnetic Resonance and Mass spectroscopic studies of fluorescent complexes of glycine-oxine and glycine-8-quinoline.

Radiochemistry and radiochemical separations

Essential Mineral element composition of rice *Oryza sativa* L. Detection limit, coefficient of variation and analytical throughput were estimated as 29 mg L⁻¹, 4.

Abstracts, Analytical and Bioanalytical Chemistry

Academy of Sciences of the USSR, Moscow, USSR : The determination of submicrogram amounts of rare earth elements in natural waters by neutron activation analysis after concentrating and separation by paper chromatography. Phil 2009 Evaluation of Zn and Cd in different Biological Samples of cancerTs patient.
