The sole—and critical—exception concerned the right of representation. It was both an ideal for the guidance of governors and a standard with which to measure the constitutionality of government; both a cause of the American Revolution and a purpose for drafting the United States Constitution; both an inheritance from Great Britain and a reason republican common lawyers continued to study the law of England. American perceptions of the responsibility of representatives to their constituents, the necessity of equal representation, and the constitutional function of consent had diverged gradually, but significantly, from British tradition.
