### Amazing Insects

Not only do they have their own sophisticated means of communication, they also have extraordinary navigation skills despite the fact that their eyesight is limited.

### Amazing Insects Archives

This marvel of Nature also goes by another name, though. If disturbed, it will emit a spray of liquid from the tip of its abdomen. Brush jewel beetle  
Scientific name: *Julodis cirrosa* Distribution: Southern Africa Size: 25 to 27 mm approximately 1 inch long This metallic, blue-green jewel beetle has a cylindrical body with a surface coarsely punctured and covered with tufts of long, waxy, whitish, yellow or orange hairs.

### Amazing Insects

It does, however, have some unsavory feeding habits—namely, sucking up nutrients from rotting flesh and fruit. And yet less research and regulatory consideration has focused on Z. This might surprise you, but these two seemingly-unrelated subjects have been connected by these incredible creatures.

### Amazing Insects Archives

There are around 35 species of Christmas beetles in Australia. For their experiment, the scientists used Tunisian ants. On the US east coast they live underground for years at a time, surfacing every 13 - 17 years to live for a short period above ground.

### 14 of the world's weirdest insects

Seems like a disadvantage to roll only in a straight line. So they remain hidden on oak trees. Just lying here, deceased and unmoving.

### Top 10 Most Beautiful Insects in the World

Certain caterpillars, ladybugs, many beetles, weevils, robber flies, and giant water bugs all employ this technique.
