### Women and Men in STEM Often at Odds Over Workplace Equity

Chinese women have become more active in asserting their rights through protest, but outlets for activism are increasingly difficult to find. There has to be a focus on rights and ethics in technology development — and we should remember that it can also be positively subversive.

### How Americans view gender equality as 19th Amendment turns 100

In order to insure that every child has access to the baseball game, we can provide them with boxes to stand on.

### How Technology Is Helping Close the Gender Gap and Empower Women

Others have cited the more general potential of ICTs for economic empowerment e. It is an important stepping stone that is essential to kickstart positive change and sustainable development. The more opportunities girls are provided to learn, the better our tech landscape looks.

### Center for Women in Technology

Not surprisingly, the countries that saw the largest increases in the gender gap—Afghanistan, Benin, CAR, Haiti, Liberia, India, Togo, and Yemen—still have large gender gaps today. Such as incorporating technology as part of our classrooms.

### All Americans Not Equal: Mistrust and Discrimination Against Naturalized Citizens in the U.S.

Crisis and famine is no longer local in a mobile and interconnected world.

### Women and the Future of Work

. She is always found at the heart of the action bringing an important innovation, new concept or out of the box idea which is focussed on

improvement and new found value, with a passion for creating holistic user experiences, which bridge the digital and physical world.

### **The Truth About Why There's Not Enough Women in Tech**

In 2016, China further maternity leave by an additional one to three months depending on province. About one-in-five women in STEM and non-STEM jobs say they have experienced sexual harassment at work. In the Pew Research Center survey — conducted before the string of prominent sexual harassment allegations and of these issues on social media outlets and elsewhere — some 22% of working women in the U. This also lead us to the point where we look at individual contribution by using performance and output measures instead what one can do, how much, how fast instead of recognizing the actual impact on the individuals, community, society and economy which is far more important for sustainable development.
