Japanese Buddhist Architecture

History of Horyu-ji Temple The idea to build Horyu-ji Temple was conceived by Emperor Yomei.

Visiting Horyu

Despite its fame, the origin of the statue is actually uncertain. Her nephew was , who is widely credited as the foremost patron of

Lecture #7

The structures include 21 buildings in the Hōryū-ji East Temple, 9 in the West Temple, 17 and other buildings, and the pagoda in Hokki-ji. Foreign powers influenced Japanese politics and culture complicated by relationships between Japan and the Far East Asian Tang Dynasty of China, Koryo of northern Korea and the Silla of southeastern Korea.

Buddhist Monuments in the Hōryū

Seoul: National Museum of Korea, 1998. General features of Japanese Buddhist Architectures Actually, the architectural styles of Japanese Buddhist buildings were imported from China and various other Asian countries.
