## Soviet Space Program

Korolyov died in January 1966 following a routine operation that uncovered colon cancer and died from complications from heart disease and severe hemorrhaging. In retrospect, one can now observe the pattern which emerged as Soviet Space exploits became more frequent. They were in orbit for 24 days, completing experiments, observations, and other tasks.

**The Soviet manned space program : an illustrated history of the men, the missions, and the spacecraft : Clark, Phillip : Free Download, Borrow, and Streaming : Internet Archive**

The text examines both the developmental and operational aspects of the missions, which at the time were clouded in secrecy.

## Manned Missions

Soviet defense factories had been assigned numbers rather than names since 1927. Soyuz T-4 USSR Foton March 12, 1981 Kovalenok and Savinykh became the fifth crew of Salyut 6.

## NASA Artemis

Memorably, the command module of was ruptured by an explosion on April 13, 1970. Komarov admitted that he did say something along these lines.

## Space Race Diary

And indeed, Dovgan sometimes felt as if he were.

## History of Humans in Space

Both nations conducted significant experimental efforts with regard to anti-satellite ASAT systems and monitored the other's efforts — one example of U.
