**What is journalism for? In today's world, here are four key purposes**

She considers how magazines endeavour to promote specialised content in a challenging marketplace — including strategies whereby digital brands are cautiously developed alongside more traditional conceptions of magazine journalism in hard copy.

**Lecture 1: What Is Cultural Journalism? (An Introduction to Cultural Journalism. Online course by Dr Maya Jaggi)**

Moreover, the courses throughout the year are multifaceted and all take a different approach to the world of media and journalism and we often discussed current issues. Journalists and the Big Conversation, Liisa Rohumaa looks at the challenges faced by journalists and offers some practical insights into how they can respond to feedback, stay relevant to readers, make contacts and develop their role in online communities.

**Narrowing the discourse? Growing precarity in freelance journalism and its effect on the construction of news discourse**

Most news organisations today work with a range of metrics, including both older ones like pageviews and unique users and newer ones like shares. Collaborative Project 20 credits The unit will introduce you to team skills and the roles and responsibilities associated with group working and additionally enable you to put into practice principles associated with personal and professional development. Among those who got his start as a printer's apprentice was future Founding Father, Benjamin Franklin.

**Why the News Is Not the Truth**

In Social Media and Sports Journalism, Louise Matthews and Daniel Anwar focus on the use of Twitter by football journalists, considering its effects on traditional news practice. Alar was a pesticide sprayed on apples, and studies for the Environmental Protection Agency found that it caused tumors in laboratory animals that had been given high doses. De Cleen is also a fellow of the at the Central European University in Budapest, Hungary.

**Journalism, Culture and Community**

In each of these courses you look at journalism and media in Europe from a specific perspective.

### **Women Making News: Gender and Journalism in Modern Britain**

The audience team plays an important role in making sure that everyone in the newsroom understands the data and learns how to build a narrative from the numbers, instead of just handing reporters a bunch of metrics and statistics. While some scholars and journalists are ready to say goodbye to print editions in as few as five years, newspapers remain an important part of the wider news ecology.

### **Communication Studies: Journalism and Media in Europe**

The ad money moved away from the big networks, and the emphasis for news companies changed. Palmer, a professor of early modern European history at the University of Chicago, compares early printed books like the to how e-books struggled to find a market before Amazon introduced the Kindle.

### **Communication Studies: Journalism and Media in Europe**

It is your chance to impress the team by demonstrating your appreciation of what the course can offer you and how you feel it will help you in the future. But it also applies to some bigger private media.
