Extraterrestrials: Where Are They? by Ben Zuckerman

Exploration of the Solar System, and observations with telescopes that probe deep space, have come up empty handed in searches for evidence of extraterrestrial life. Is it possible that extraterrestrial life forms exist within our Galaxy, the Milky Way? Dyson has concluded that if advanced civilizations exist in our galaxy, finding evidence of them should be as easy as finding signs of technological civilization on Manhattan Island in New York City. The distances between stars are vast almost beyond our comprehension.

He became suspicious that some of them had only recently died, presumably tortured and killed by the corporations that were running the programs. Two years after his initial interview, , and his identity was never publicly disclosed. This book addresses that argument, mostly in agreement with Fermi.

Where are the extraterrestrials?

And he had told me that they were very keenly interested in our religious development, our spiritual development, that they were very wise, very advanced, and they really seemed to want us to become ethical and to learn how to all get along with each other. Extraterrestrials who look just like us not only exist throughout the galaxy, but tens of thousands of them have infiltrated communities all over the planet as neighbors, co-workers, teachers, doctors, humanitarians, etc. The Doubts Begin A number of scientists are beginning to realize that their colleagues have made far too many optimistic assumptions in addressing this question.
