### What do these sources suggest that family life was

These changes are the result of a declining Negro death rate, now approaching that of the nation generally, and a fertility rate that grew steadily during the postwar period. Few of us can see how much we owe to this power, the most precious of our inheritances. Share a history-based question that you have after reading these sources.

### Gap in U.S. Black and white unemployment rates is widest in five years

At present there are deplorably few opportunities for negroes to learn craft work in an effective way; a few schools have made some essay towards it, but none of them have proposed it as their main object.

### Chapter V. The Case for National Action

Like the national unemployment situation, he suggests that disaster was immanent in Chicago without extensive social and economic change. The gradations of this power mark the limits between savage and civilized man.

### Gap in U.S. Black and white unemployment rates is widest in five years

We should extend every effort to uncover and correct them. If the black is weak in these things, he is in so far unfit for an independent place in a civilized state.

### What do these sources suggest that family life was

Of the greatest importance, the Negro male, particularly in the South, became an object of intense hostility, an attitude unquestionably based in some measure of fear. These are mainly in the shore regions of the Atlantic and the Gulf States, where the climate is tolerable to the African, but difficult for those of European blood to endure.

### Black Unemployment Rate Rises to 16.8%, White Joblessness Falls

Any colonies of whites in these districts should be drawn from Southern Europe, from peoples accustomed to a hot climate and miasmatic conditions. Any one who knows the negroes well has remarked that there was a much greater difference among them than we perceive among the whites of the same low position in England or elsewhere.

### **The Negro Problem**

We had unemployment in 1932 Jobs were being lost by Negroes, and they were in need. A cycle is at work; too many children too early make it most difficult for the parents to finish school. The number of unemployed in this country was growing in 1933 According to the statistics of the American Federation of Labor, the number of unemployed increased from 3,216,000 in January, 1930 to 13,689,000 in March 1933.

### **What do these sources suggest that family life was**

In overall terms, median family income is lower for large families than for small families.
