GLACIAL AND SURFICIAL GEOLOGY

Groundwater is recharged in the springtime with rain and snow melt, but drops throughout the summer. The state is made up of three distinct terranes, including Laurentia, Iapetus Ocean terranes and the former microcontinent of Avalonia. Only the bedrock surface would remain.

Ground water favorability and surficial geology of the Portland area, Maine

The lake covers the eastern side of Eagle Lake township.

Ground water favorability and surficial geology of the Portland area, Maine

The pattern of rocks shown on a bedrock map represents the rock types at the surface. Similar soils are found across an additional 23% of Maine. Detailed maps and roadlogs guide you through the woods to such hidden wonders.

Geology of Maine

Issued as 54th Annual Report of the NYSM Part 2, and also contains contains NYSM Bull. Arms 1900 CONCRETIONS FROM THE CHAMPLAIN CLAYS OF THE CONNECTICUT VALLEY Boston: By Author, small folio, corners rubbed else vg. 45 pp. At the time the new composite continent was positioned south of the equator.
