The Light Ages: The Surprising Story of Medieval Science by Seb Falk

This Source Book offers a rare opportunity to explore more than ten centuries of European scientific thought. Et an trat bis o ocht ceimínna deg co tri ceimínnaib fichet on grein as annsin as mo a cainndighacht caindicht. That the book is not always fascinating is a clue.

II Early Medieval

He humanises his discussion of medieval science not only by grounding his discussion For full transparency: I myself am a medieval researcher and, tangentially, know the author. The first record of it I can find is in a MS.

The Light Ages: The Surprising Story of Medieval Science by Seb Falk

I have thought it unnecessary to italicise the commoner extensions of compendia except where there was room for doubt.

An Irish Astronomical Tract

An excellent introduction on the thoughts and monuments of earlier cultures. These virtues are accompanied by an increasingly technical jargon, which makes so much late-medieval philosophy intimidating and formidable to non-specialist readers.

An Irish astronomical tract based in part on a medieval Latin version of a work by Messahalah; : Māshā'allāh, 730?

Et mar sin is follus co iat co minic ni bud tusca na n-aimsir sin da madh o na fertanaib da ticfad tuili srota Nil. This factor, combined with the fact that the Jesuits also sympathized with the need of the Qing Dynasty to replace the old Ming calendar with a better one of their own enabled the Jesuits to make a significant impact on the Chinese Imperial Court. Dico quod Luna ac sidera, etcetera.

II Early Medieval

This Chapter is very different from Chapter 1 in Stabius' edition of the Latin; though the two chapters unquestionably correspond. The part that Osiander played in counteracting the critique was by writing the forward or rather preface of Copernicus's book to refrain it from getting questioned, within the preface he essentially alluded to the fact that Copernicus's system may be mathematically accurate and therefore would be true, but states that it is all a theory.
