

Cerebral damage before and after cardiac surgery

Kluwer Academic Publishers - Cerebral Damage Before and After Cardiac Surgery

Description: -

Postoperative Complications.
Heart Surgery -- adverse effects.
Brain Diseases -- etiology.
Cerebral circulation.
Brain damage -- Diagnosis.
Neurologic manifestations of general diseases.
Psychological manifestations of general diseases.
Heart -- Surgery -- Complications. Cerebral damage before and after cardiac surgery

27.

Developments in critical care medicine and anesthesiology ;

v. 27

Developments in critical care medicine and anesthesiology ; Cerebral damage before and after cardiac surgery

Notes: Includes bibliographical references and index.

Is There Long

Then that rotated and suddenly I was having a terrible struggle with something not so hard a few days before. Non-invasive optical measurement of cerebral metabolism and hemodynamics in infants.

Improving Neurologic Outcome after Cardiac Surgery

Benzodiazepines, which worsened outcomes with higher doses, bind to γ -aminobutyric acid receptors in the brain to produce their sedative effects and cause neuroapoptosis in neonatal animal models.

Non

A third MRI was obtained at age 3—6 months, immediately before a second stage surgery with general endotracheal anesthesia, or with intravenous sedation with pentobarbital or propofol.

Serum S100 protein as a marker of cerebral damage during cardiac surgery

Antegrade regional cerebral perfusion RCP has been proposed as a better perfusion technique to avoid or minimize duration of circulatory arrest and maximize oxygen delivery to the brain.

Technology Insight: brain MRI and cardiac surgery—detection of postoperative brain ischemia

. Even health care professionals are unaware of how common verbal and physical aggression are at home. A post-operative research MRI obtained on this subject 13 days after surgery showed multiple foci of white matter injury of unclear etiology as a preoperative MRI was not obtained.

Improving Neurologic Outcome after Cardiac Surgery

I often wish there was something we could have done differently obviously better rehab and behavior modification so we might have remained a

family, as we still grieve from the loss of the family we once had.
