Alphabetical Listing of Commodity Codes

Experiences from the 1993 Commodity

Flow Survey. The CFS, conducted by the Bureau of the Census for the BTS as part of the Economic Census, is the most comprehensive freight data source on national and state level freight activities since the most 1977 Commodity Transportation Survey CTS.

Commodity Flow Survey (CFS) 2002 [dataset]

The report also recommends approaches BTS and its survey partners should adopt to develop more effective survey methods and address institutional issues affecting survey stability and quality. The lack of coverage of the intervening 4 years means that time trends in freight activity, such as the effects of emerging from a period of recession or severe drought, cannot be studied satisfactorily using the CFS data alone.

C Letter Report on the Commodity Flow Survey

Such respondent burden research could be investigated through focus groups or survey research among firms. That is why we go the extra mile to ensure that our carriers are satisfied. Print reports are available for the 2007 U.

Moving Goods in the United States

Although the CFS attempts to provide reasonably complete data on the movement of goods in the United States, there are some notable gaps in both shipment and industry coverage. In failing to share this information, the CFS partnership deprived itself of opportunities to enlist the support of users in seeking additional funding for the 2002 survey.
