Wherever you are in the process, you can use the information on this page and the ones that follow it to help you through the steps of creating authentic assessments. These issues can be brought to team discussions or professional teaching communities in order to facilitate a non-judgmental conversation about improving classroom practice.

ERIC

It is not always easy when you are an expert in the field to determine how difficult a question will be for students, so ask yourself: How many subskills are involved? Write instructions that preview the exam.

Creating Exams

This study presents a novel computer-assisted approach to diagnosing student learning problems in science courses.
