Rainforest Animals: 13 Iconic Rainforest Species Examples ✓ ☐

Some species of toucans have bills that are more than half the length of their bodies. They experience a wider range of temperatures, and are cooler than tropical types.

Tropical Rainforest Animals and Plants with Pictures and Names

Wild horses Wild horse at Sand Wash Basin. Glass frog tadpoles freely flow from the trees and fall directly into the water upon hatching. Within the Rocky Mountains themselves, there are 27 trails that range from northern to southern Colorado.

What Animals Live In The Amazon Rainforest?

They are wild animals and will charge when they feel threatened.

List of Temperate Forest Animals

Jaguars are on the top of the food chain and play an important role in tropical rainforest ecosystems. Bearing a strong resemblance to its guinea pig cousin, the capybara is the largest rodent on Earth, weighing in at more than 100 pounds and standing two feet tall. Contrary to popular belief, piranhas rarely attack humans and may only do so when stressed.

Animal

The bright colorful patterns really make these small frogs stand out in the rainforest.
