Miocene Cyclopoid Copepod from a Saline Paleolake in Mojave, California

It grows in close mats in the gypsum banks, being almost the same color. Bulletin of the American Museum of Natural History, 117:157-169.

Shark Fossils (part 3)

On leaves of Ranunculus cymbalaria. The Vertebrata of the Oligocene of the Cypress Hills, Saskatchewan.

Mammalian Fauna of the Middle Eocene Kishenehn Formation, Middle Fork of the Flathead River, Montana

The results thus far seem somewhat confusing, but I am still inclined to think they will verify my supposition, for I find the stomata not only more distant, but somewhat smaller, on Western plants. The Cryptoceras Springeri White and St.

The Evolution and Paleobiogeography of Flying Squirrels (Sciuridae, Pteromyini) in Response to Global Environmental Change

Living in a deep desiccated Mediterranean Sea: An overview of the Italian fossil record of the Messinian salinity crisis. Wheat-Stbaw Wobm Isoaoma tritici Riley. UMNH IP 4854, sex cannot be determined, antenna with allobasis in ventral view; arrows show the insertion sites of five setae on the medial margin of the penultimate segment of the antennal endopodite.
