## UNITED STATES GOVERNMENT RESEARCH. REPORTS

Below is a typical example which illustrates the use of the trial and error method: the story of how Charles Goodyear invented raw rubber vulcanization. Recall that the radiant power of an object as measured by a detector comprises two components: up E Useful reductions of the appearance of emissivity artifacts as well as other background effects may be achieved by subtraction of an image taken of the object in a quiescent state, sometimes called a reference image. Evaluation of the project will be carried out at the end of second semester.
