## The Office of Public Health Practice & Training

Other prominent and internationally renowned leaders are also on the docket to join the discussion. Educational Specialists will NOT be required to complete Student Learning Objectives. The letter is only required when contracting with a new dentist.

## School Health Services

The Dental Hygiene Authorization Plan must be closed before SHARRS can be opened in order for the system to process reports correctly. Appointments shall be approved by the Department of Health. This philosophy translates into doing real, collaborative work with external partners that produces tangible results and is integrated into the School's academic, research, and service activities.

## School Health Services

At the Colorado School of Public Health, we conduct qualitative and quantitative research to help prevent disease, promote health, and improve the well-being of communities. Once reverted to a mandated program it cannot be changed to a dental hygiene program after the closing date due to processing requirements.

## Overview of Public Health Practice

Schools will need to print copies of the Private Dentist Report and School Dental Health Record. Schools may accept exams on the private dentist's own form as long as it is comparable to the DOH approved form.
