Monumental Connections: Lectures and Talks

Conclusions We set out to address the following questions in this study: 1 Are the geochemical source compositions of Nihoa and Necker Islands distinct from each other and from other Hawaiian Islands? They left behind an extensive archaeological record of stone architecture and artifacts that remains largely in situ and still largely unstudied.

Archaeology of Nihoa and Necker Islands

Minimal depositional processes exist on Nihoa due to the steep topography Bishop, 1885a,b; Clapp and Kridler, 1977; Clapp et al.

Archaeology of Nihoa and Necker islands, [Vol. 1, no. 53]

The risk is weighed against the importance of the potential benefits of going to the downwind destination. There are no trees and is no soil.

Nihoa and Mokumanamana

A Preliminary petrographic study of Hawaiian Stone adze quarries. For Kekuewa such islands—there are at least twenty-five in Polynesia, including Pitcairn, Raoul, Norfolk, Kiritibati Christmas and Tabuaeran Fanning—hold the key to understanding a crucial chapter in the history of Pacific voyaging.

Archeology of the “Mystery Islands” Nihoa and Mokumanamana (U.S. National Park Service)

Journal of Volcanology and Geothermal Research 151, 19e49. Evidence for two shield volcanoes exposed on the Island of Kauai, Hawaii. In: Bishop Museum Bulletin 35.
