Welcome to Policy Studies Institute

Within this broad policy concept, two absolute axioms to govern our behavior may be set down.

William R. Kintner

Between May 1978 and January 1988, there were no confrontations between South African and Cuban ground forces despite their deep involvement in the civil war.

Although the great majority of Americans are agreed that Communism is an evil, they are divided — as they are on almost all major national issues — on what to think and what to do about Communism and its threat to the American way of life. Strausz-Hupé, a consummate geopolitician, showed how to defeat Soviet efforts through an integrated understanding of them.

Handbook of International Relations

To forgo investing in the civil war at any level is to forfeit the stakes that inspired intervention in the first place, whether they be shifts in the relative balance of power, trade and market access, or credibility concerns; yet, to invest at the level required to ensure a domestic client's victory risks the spiraling of costs and enlarged conflict with the opposing intervener. Munro, both of whom have been correspondents in China and bureau chiefs in Asia, examine China's continuing portrayal of America as the enemy; the shifts in Beijing's perception of American might; the enormous boon to China that the takeover of Hong Kong represents; China's increase in military strength; its challenging positions on Taiwan and the South China Sea; its sale of weapons to U. .
